Journal of Testing and Evaluation
Table of Contents
Volume 24, 1996

No. 1, January

Robust Design of the Iosipescu Shear Test Specimen for Composites—Y. J. CHIANG 1

The Unlubricated Sliding Wear of Steels: The Contact Conditions in the Sliding Zone—SINGHAI BIAN, SOPHIE MAJ, AND DOUGLAS W. BORLAND 12

Precision of Marshall Stability and Flow Test Using 6-in. (152.4-mm) Diameter Specimens—PRITHVI S. KANDHAL, YIPING WU, FRAZIER PARKER, JR., AND PETER A. SPELLERBERG 20

Prediction of Single-Layer Fabric Air Permeability by Statistical Modeling—HELEN H. EPPS 26

Symposium on Operation and Accreditation of Laboratories
Third-Party Inspection Agency Response to Changing Needs—ARTHUR KAY 32

Evolution of the Internal Quality Audit at Ford Motor Company's Central Laboratory—ARSEN TERJIMANIAN AND CAROL J. KELLY 37

NICET Certification—Addressing the Technician Component of Laboratory Quality—CHANNING PAO, MICHAEL A. CLARK, AND JOHN D. ANTRIM 45

Development and Application of a Quality System Standard for Construction Materials Testing Laboratories—PETER A. SPELLERBERG, WILLIAM L. TRIMM, AND JAMES H. PIELERT 49

No. 2, March

Testing and Evaluation of Metal-Plate-Connected Wood Truss Joints—M. VATOVEC, R. GUPTA, AND T. MILLER 63

Fracture Mechanics Expressions for the Standard Chord-Supported Arc Bend Specimen—S. TARAFDER, M. TARAFDER, AND V. R. RANGANATH 73

Evaluation of Test Methods and Environmental Conditions to Promote Efflorescence Formation Under Laboratory Conditions—THOMAS VICKERS AND MOSONGO MOUKWA 80

Symposium on Industrial Applications of Titanium and Zirconium

Introduction to Journal Section on Industrial Applications of Titanium and Zirconium—JAMES. S. GRAUMAN AND R. TERRENCE WEBSTER 84

Titanium Cerebral Aneurysm Clips: Characterization and Performance in Magnetic Resonance Imaging and Computed Tomography—J. C. HO, C. Y. WU, M. J. CARRON, K. P. MAUGHAN, AND F. J. SCHMIDT 85

Commercial Applications of Zirconium Explosion Clad—JOHN G. BANKER 91

Ti Roll-Clad Plate: More Cost-Effective Plate Products for Utilizing Titanium and Zirconium Alloys in Chemical Processes—R. W. SCHUTZ 96

Development and Applications of Titanium Alloy SP-700 with High-Formability—ATSUSHI OGAWA, MASAKAZU NIIKURA, CHIAKI OUCHI, KUNINORI MINIKAWA, AND MAKATO YAMADA 100

Performance of Zirconium and Zirconium Alloys in Organics—TE-LIN YAU 110

Expanded Windows for Titanium Use in the Pulp/Paper Peroxide Bleach Plant—R. W. SCHUTZ AND M. XIAO 119

Symposium on Tantalum, Tungsten, Molybdenum, and Titanium in Ballistics Applications

Empirical Determination of the Manufacturing Processes Which Affect EFP Liner Performance—ERNEST C. FACCINI AND HOWARD A. WOODBURY 123

Testing Forum: Minimum Thickness Requirements for Rockwell Hardness Testing—T. G. HEBERLING, A. R. FEE, AND E. L. TOBOLSKI 131

No. 3, May

Eliminating Wasteful "Cut and Try" Procedures in Gas Chromatography Method Development Using Computer Modeling—R. ANNINO AND R. VILLALOBOS 143

The Extraction and Determination of Azadirachtin from Soil and Insects by Supercritical Fluid Extraction—MATTHEW W. BROOKS, SUSAN ROY, PETER C. UDEN, AND PATRICIA VITTUM 149

Accuracy of Wood Resistance Sensors for Measurement of Humidity—CHARLES CARLL AND ANTON TENWOLDE 154

Determination of the Geometric Profile and Stress/Strain State in the Necked Region During Inelastic Deformation at Elevated Temperatures Using a Non-Contact Measurement Technique—W. GAUDIG, K. BOTHE, A. K. BHADURI, AND K. MAILE 161

Cyclic Tests on High-Strength Prestressed Concrete Frames—Y. L. MO AND W. L. HWANG 168

Fly Ash as a Pre-Filter Material for the Retention of Lead Ions—N. S. PANDIAN, C. RAJASEKHAR, AND A. SRIDHARAN 181

Time-Dependent Bending Properties of Lumber—I. ROBERT KLIGER AND P. J. PELLICANE 187

Technical Note: A Modified Theodolite Instrument: Conceptual Work—MOHAMMED TALEB OBAIDAT AND ZAID A. AL-SMADI 194

No. 4, July

Measurement and Analysis of the Overnight Small Package Shipping Environment for Federal Express and United Parcel Service—S. PAUL SINGH AND A. CHEEMA 205

Creep Lifetime Under Constant Load and Constant Stress: Theory and Experiment—J. AKTAA AND B. SCHINKE 212

Objective Assessment of Fabric Handle in Fabrics Treated with Flame Retardants—JAI O. KIM AND B. LEWIS SLATEN 223

Development of Analytical Methods for Quantification of Residual Powder on 'Powderless' Latex Gloves—ELLEN TUANYING CHEN, KATHRYN HUGHES-DILLON, AND LEROY W. SCHROEDER 229

The Effect of Fiber Coating on the Temperature Dependence of the Elastic and Anelastic Properties of a Fiber-Reinforced Borosilicate Glass Matrix Composite—A. WOLFENDEN, H. M. THOMAS, V. THOMAS, AND K. K. CHAWLA 237

Leakers as a Function of Closure Type in Gallon-Size Plastic Bottles in Simulated Small Parcel Test Environment—S. PAUL SINGH AND VIVEK P. SYAL 241

Comparison of Walkway-Safety Tribometers—MARK MARPET 245

Initial Deformation During Small Punch Testing—JIN SOOK CHEON AND IN SUP KIM 255

Fatigue Under Stress Cycling With Nonzero Means—YI GONG AND MICHAEL P. NORTON 263

Technical Note: Diagnosis of Machinery by Analysis of Running Temperature Data—LAZAR SEGAL 268

No. 5, September

Preliminary Characterization of Thermal Diffusivity for Carbon-Carbon Composites Through Pulsed Video Thermal Imaging—MANOHAR R. KULKARNI AND ROBERT P. BRADY 275

Two Parameters Limiting the Sensitivity of Laboratory Tests on Condoms as Viral Barriers—C. DAVID LYTLE, LICIA B. ROUTSON, DELMA P. THOMAS, WILLIAM F. REGNAULT, AND W. HOWARD CYR 279

Optimal Design of a Disk-Shaped Specimen for Biaxial-Tensile Fatigue Testing—A. ZOUANI, T. BUI-QUOC, AND M. BERNARD 287

A Critical Evaluation of the Performance of Optical Fiber Sensors for Monitoring Dynamic Strains—RAMAN SINGH AND ARUN SHUKLA 295

Structure and Property Evaluation of Large-Diameter Spray-Formed Superalloy Piping—A. L. MORAN AND R. E. REBIS 302

Technical Note: A Fracture Test Method for Mode I Fracture of Thin Metal Materials—B. COTTERELL, M. C. SIM, G. AMRUTHARAJ, AND S. H. TEOH 316

Technical Note: Improved Indentation-Depth Method of Hardness Measurement—YURI V. EZHOV 320

Technical Note: Review of Durability Testing of Building Stone with Annotated Bibliography—DONALD D. CARR, JAMES STRICKLAND, WILLIAM H. MCDONALD, AND SEYMOUR BORTZ 324

Technical Note: Creep Testing of Steels at Very High Temperatures—J. LINDBLOM, F. SEITISLEAM, AND P. J. HENDERSON 329

Testing Forum: Bias Testing: Myths, Misconceptions, and Mistakes—GREGORY GOULD 333

No. 6, November

High-Resolution Force-Plate Analysis of Utilized Slip Resistance in Human Walking—FRANK L. BUCZEK, JR. AND SCOTT A. BANKS 353

Required Coefficient of Friction Versus Walking Speed: Potential Influences of Footwear and Walkway Surfaces—ANN E. FENDLEY AND MARK I. MARPET 359

Surface Roughness of Footwear Soling Materials: Relevance to Slip Resistance—F. JAMES ROWLAND, CARLA JONES, AND DEREK P. MANNING 368

Slip Resistance Characteristics of Footwear Solings Assessed Using the SATRA Friction Tester—MIKE WILSON 377

A New Approach to Measuring Transverse Properties of Structural Tubing by a Ring Test—SYLVIE ARSENE AND JINBO BAI 386

Color Change as a Predictor of Strength Loss in PFD Cover Fabrics—HELEN H. EPPS AND KAREN K. LEONAS 391

Corrosiveness of Chromate Exposure to Steel Embedded in Soil or Concrete—RANDALL W. POSTON, CHRISTOPHER L. GALITZ, AND JASON S. YATES 396

Comparison of *R*-Curve Methodologies for Ranking the Toughness of Aluminum Alloys—ANTHONY P. REYNOLDS 405

Creep Rupture Investigation of 63Sn-37Pb Solder by Experiments and Damage Mechanics—SHEN-HAW JU, BELA SANDOR, AND MICHAEL E. PLESHA 410

Effects of Fatigue on Fragility Testing and the Damage Boundary Curve—GARY BURGESS 418
